

Organic Matter	I am made from what was once living organisms. Different types of bacteria eat me.
Protozoa	I eat bacteria, about 10,000 bacteria per day, on average. Sometimes I eat fungi too.
Bacteria	I eat organic matter, which comes from plants and animals.
Fungi	I eat organic matter, like dead leaves. In fact, I am the world's best decomposer!
Protozoa (Predator)	I eat other protozoa. My waste is also food for plants.

Plants	I take up nutrients from the soil, which is made from decomposed organic matter.
Arthropods (Shredders)	I am a shredder. I chew up organic material and make smaller pieces that fungi and bacteria can eat.
Arthropods (Shredders)	I eat protozoa. I could be a beetle, mite, cockroach, springtail, or millipede.
Arthropods (Predators)	I am a centipede. I eat other arthropods, and also worms. Birds (especially chickens), and toads eat me.

Arthropods	I could be a fly, spider, lobster, or crab. My waste is food for the plants.
------------	------------------------------------------------------------------------------

Nematode (Root Feeders)	I eat living plant material, especially living roots, which hurts plants.
Nematode (Predators)	I eat all other nematodes, as well as protozoa!
Nematode (Bacterial)	I eat bacteria. My waste is food for plants.

Nematode (Fungal)	I eat fungi. My waste is also food for plants.
Animals	I eat arthropods. I could be anything from a snake to a human!
Birds	I eat arthropods. My waste is fertilizer for the plants.
Worms	I have no eyes and no teeth. I mostly eat bacteria. My waste is food for plants.
Worms	I eat fungi, protozoa, nematodes, and organic material! My waste is food for plants.

Plants	I take up nutrients from the soil, which is made from decomposed organic matter.
Organic Matter	I could be fallen leaves, food scraps, and rotten meat.
Protozoa	I eat bacteria, about 10,000 bacteria per day, on average. Sometimes I eat fungi too.
Bacteria	I eat organic matter, which comes from plants and animals.
Fungi	I eat organic matter. In fact, I am the world's best decomposer!
